R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see http://rmarkdown.rstudio.com.
When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

Subsubsubtitulol

asda dasdasdasdasdadas dasdasda
1. asdasd
2. asdasd
3. uff

```r
elgrafico <- readRDS("grafico.rds")
elgrafico
```

Including Plots

You can also embed plots, for example:

```
# plot(pressure)
library(ggplot2)
ggplot(pressure) +
  geom_point(aes(temperature, pressure))
```

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.

Species	n	mean
setosa	50	5.006
versicolor	50	5.936
virginica	50	6.588
